SUMMARY

Full-Stack Developer who ships production systems end-to-end: built and deployed a live ERP for a Coca-Cola distributor (in daily operational use) and Chartix, a live SaaS. Open-source contributor (private org member). 2× hackathon winner.

EDUCATION

Bachelor of Engineering in Information Technology | **Vidyalankar Institute of Technology** *2024–2027*
CGPA: 9.86/10

Diploma in Information Technology | **Vidyalankar Polytechnic** *2021–2024*
Aggregate: 92.31%

TECHNICAL SKILLS

Frontend: React.js, HTML, CSS | **Backend:** Node.js, Express.js, REST APIs | **Databases:** PostgreSQL, MySQL, MongoDB, Firebase | **Languages:** Java, Python, C++, JavaScript | AWS (fundamentals), Docker, Git/GitHub, CI/CD

WORK EXPERIENCE

Full Stack Developer Intern | **ZootechX** | **Hybrid** | **Mumbai, India** ***Sep 2025 – Mar 2026***

- Architected and deployed a production ERP for a Coca-Cola distributor, integrating Admin (Web), Counter Sales (Web), and Driver (Mobile) apps on a unified Node.js/Express/MongoDB backend.
- Designed scalable REST APIs, optimized MongoDB with aggregation pipelines and bulk writes, and automated PDF invoice parsing with Python, cutting reporting turnaround by 50%.
- Owned client onboarding, solution architecture, deployment, and production support end-to-end, delivering a business-critical system used daily for live distribution operations.

Web Developer Intern | **Elightlabs** | **Remote** ***Jun 2023 – Jul 2023***

Built responsive web applications and integrated RESTful APIs to streamline data flow across devices.

PROJECTS

Attendify – Smart Attendance Management System *GitHub*

- Built a Flutter-based attendance app integrated with Firebase to eliminate proxy attendance by 80% through advanced authentication and BLE technology.
- Implemented device ID verification and dynamic QR codes (auto-refresh every 10–15 seconds) to enhance security and prevent misuse by 95%.
- Developed real-time BLE scanning and server-side validation for seamless teacher-student attendance tracking, improving accuracy and efficiency of records.

Chartix – AI-Powered CMT Exam Prep Platform (Live SaaS) *GitHub Live*

- Designed and maintained a ∼30-model relational schema (PostgreSQL via Prisma) for curriculum content, quizzes, payments, and entitlements, using soft-delete versioning and immutable snapshots to preserve historical data integrity.
- Built an OpenAI-embeddings pipeline that transforms unstructured curriculum notes into structured, embedded chunks stored in a PostgreSQL vector store (pgvector), powering a RAG-based AI tutor and full quiz engine.
- Integrated Razorpay payments and hardened pipeline reliability with rate limiting, idempotent writes, and error handling on a production serverless PostgreSQL (Neon) deployment.
- Managed schema evolution with Prisma migrations and Git-based version control, taking the product from design through live, paying users end-to-end.

Ninsho – Security-First Auth Engine for Node.js (Final-Year Project, Open Source) *GitHub*

- Designed and built an open-source authentication library covering sessions, passkeys/WebAuthn, refresh-token rotation, and DPoP proof-of-possession for token binding.
- Implemented Redis-backed rate limiting and ownership guards to defend against credential-stuffing and unauthorized resource access, backed by extensive test coverage.
- Published as a standalone open-source library under NinshoORG, applying production-grade security patterns beyond typical academic scope.

OPEN SOURCE CONTRIBUTIONS

PinchTab *GitHub Organization*

- Contributed to a Go-based browser automation engine giving AI agents/LLMs programmatic control over Chrome via an HTTP API (scraping, testing, agent workflows), supporting multi-instance and stealth execution.
- Shipped multiple merged PRs (bug fixes and features), participated in code reviews, and was selected as a private organization member for sustained, quality contributions.

aispace-client *GitHub*

- Contributed to an open-source Go CLI and agent skill for secure, temporary file sharing between AI agents – streaming uploads, age-based encryption, and expiring links with JSON output for automation.

Achievements

- Completed advanced training in SAR (PolSAR, InSAR) at IIT Bombay *[Certificate]*
- 1st Prize, CodeStorm 2025 — LeadVault among 400+ teams *[Certificate]*
- 1st Prize, Spectrum 2026 — Smart Alumni Connect platform *[Certificate]*
- Runner-up, Capstone Project Competition *[Publication] [Certificate]*
- Consistently secured top rank for three consecutive semesters *[Certificate]*
