SUMMARY

Full Stack Developer with hands-on internship experience building and deploying real-world systems and APIs for production clients. 2x hackathon winner with a 9.82 CGPA.

EDUCATION

Bachelor of Engineering in Information Technology | Vidyalankar Institute of Technology *2024–2027*
CGPA: 9.82/10

Diploma in Information Technology | Vidyalankar Polytechnic *2021–2024*
Aggregate: 92.31%

AREAS OF INTEREST/ TECHNICAL SKILLS

Frontend: HTML, CSS, React.js | **Backend:** Node.js, Express.js | **Database:** SQL (MySQL, PostgreSQL), NoSQL (MongoDB, Firebase) | **Cloud:** AWS (fundamentals) | **Languages:** Java, Python, C++, JavaScript | **Other:** AI/ML, Git/GitHub, Docker, REST API

WORK EXPERIENCE

Full Stack Developer Intern | ZootechX | Hybrid | Mumbai, India ***Sep 2025 – Mar 2026***

- Architected and deployed a production ERP for a Coca-Cola distributor, integrating Admin (Web), Counter Sales (Web), and Driver (Mobile) applications on a unified Node.js, Express.js, and MongoDB backend.
- Designed scalable REST APIs, optimized MongoDB operations using aggregation pipelines and bulk writes, and automated PDF invoice parsing with Python, reducing reporting turnaround by 50%.
- Independently managed client onboarding, solution architecture, deployment, and production support, delivering a business-critical system currently used for daily distribution operations.

Web Developer Intern | Elightlabs | Remote | Mumbai, India ***June 2023 – July 2024***

- Designed and developed dynamic, responsive web applications using modern technologies, integrating RESTful APIs to enhance functionality, streamline data flow, and ensure seamless cross-device user experiences.

PROJECTS

Attendify – Smart Attendance Management System *GitHub*

- Built a Flutter-based attendance app integrated with Firebase to eliminate proxy attendance by 80% through advanced authentication and BLE technology.
- Implemented device ID verification and dynamic QR codes (auto-refresh every 10–15 seconds) to enhance security and prevent misuse by 95%.
- Developed real-time BLE scanning and server-side validation for seamless teacher-student attendance tracking, improving accuracy and efficiency of records.

Chartix – AI-Powered CMT Exam Prep Platform (Live SaaS) *GitHub* *Live*

- Designed and maintained a ∼30-model relational schema (PostgreSQL via Prisma) for curriculum content, quizzes, payments, and entitlements, using soft-delete versioning and immutable snapshots to preserve historical data integrity.
- Built a data pipeline that transforms unstructured curriculum notes into structured, embedded chunks (OpenAI embeddings) and loads them into a PostgreSQL vector store (pgvector) – hands-on exposure to embedding pipelines and vector databases for LLM/RAG applications.
- Wrote and optimised SQL/Prisma queries across the schema, and handled pipeline reliability concerns – rate limiting, idempotent writes, and error handling – on a production serverless PostgreSQL (Neon) deployment.
- Used Git for version control and Prisma migrations for incremental, trackable schema changes throughout development.

OPEN SOURCE CONTRIBUTIONS

Open Source Contributor | PinchTab *GitHub Organization*
Contributed to PinchTab, a Go-based browser automation tool that gives AI agents and LLM-driven programmatic control over Chrome via an HTTP API, used for scraping, testing, and agent-driven workflows. Submitted multiple pull requests covering bug fixes and feature additions, participated in code reviews, and collaborated with maintainers through Git-based workflows. Selected as a private organization member for consistent, quality contributions.

ACHIEVEMENTS

- Completed advanced training in SAR (PolSAR, InSAR) at IIT Bombay *[Certificate]*
- 1st Prize, CodeStorm 2025 — LeadVault among 400+ teams *[Certificate]*
- 1st Prize, Spectrum 2026 — Smart Alumni Connect platform *[Certificate]*
- Runner-up, Capstone Project Competition *[Publication]* *[Certificate]*
- Consistently secured top rank for three consecutive semesters *[Certificate]*
